4 First-aid measures

· Description of first aid measures
· General information:
Immediately remove any clothing soiled by the product.
Take affected persons out into the fresh air.
• After inhalation: Supply fresh air; consult doctor in case of complaints.
· After skin contact:
Immediately wash with water and soap and rinse thoroughly.
If skin irritation continues, consult a doctor.
· After eye contact:
Remove contact lenses if worn.
Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
· After swallowing:
Rinse out mouth and then drink plenty of water.
Do not induce vomiting; immediately call for medical help.
· Most important symptoms and effects, both acute and delayed:
Headache
Dizziness
Thirst
Blindness
Nausea
Acidosis
Disorientation
Unconsciousness
· Danger:
Danger of convulsion.
Danger of circulatory collapse.
Danger of impaired breathing.
Harmful if swallowed, in contact with skin or if inhaled.
 Indication of any immediate medical attention and special treatment needed:
Contains methanol / methyl alcohol. Consult literature for specific antidotes.
May produce a narcotic effect.
Medical supervision for at least 48 hours.
Monitor circulation, possible shock treatment.
E Fire fighting measures

5 Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • For safety reasons unsuitable extinguishing agents: None.
- Special hazards arising from the substance or mixture During heating or in case of fire poisonous gases are produced.

Advice for firefighters

Protective equipment:

Wear self-contained respiratory protective device.

Wear fully protective suit.

Additional information:
 Eliminate all ignition sources if safe to do so.
 Cool endangered receptacles with water spray.
 Use large quantities of foam as it is partially destroyed by the product.

6 Accidental release measures

 Personal precautions, protective equipment and emergency procedures: Use respiratory protective device against the effects of fumes/dust/aerosol. Keep away from ignition sources.
 Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation.

- · Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- · Methods and material for containment and cleaning up:

Absorb with non-combustible liquid-binding material (sand, diatomite, acid binders, universal binders). Pick up mechanically.

Dispose contaminated material as waste according to item 13.

• Reference to other sections: See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and storage

· Handling

• Precautions for safe handling:

Store in cool, dry place in tightly closed receptacles. Use only in well ventilated areas.

- Information about protection against explosions and fires: Keep ignition sources away - Do not smoke.
 Protect from heat.
 Protect against electrostatic charges.
- · Conditions for safe storage, including any incompatibilities
- · Storage
- Requirements to be met by storerooms and receptacles: Store in a cool location.
- Information about storage in one common storage facility: Store away from oxidizing agents.
- Further information about storage conditions: Store in cool, dry conditions in well sealed receptacles. Keep containers tightly sealed.
- **Specific end use(s):** No relevant information available.

10 Stability and reactivity

- · Reactivity: No relevant information available.
- · Chemical stability:
- Thermal decomposition / conditions to be avoided:
- No decomposition if used according to specifications.
- · Possibility of hazardous reactions:
- Can react violently with oxygen rich (oxidizing) material. Danger of Explosion.
- Used empty containers may contain product gases which form explosive mixtures with air.
- Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomized.
- Develops readily flammable gases / fumes.
- Develops toxic gases / fumes.
- Toxic fumes may be released if heated above the decomposition point.
- Conditions to avoid:
- Keep ignition sources away Do not smoke.
- Store away from oxidizing agents.
- Keep away from heat and direct sunlight.
- · Incompatible materials: No relevant information available.
- Hazardous decomposition products: Carbon monoxide and carbon dioxide

· Additional ecological information

· General notes:

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

This statement was deduced from the properties of the single components.

Due to available data on eliminability/decomposition and bioaccumulation potential, a prolonged damage of the environment is unlikely.

· Other adverse effects: No relevant information available.

13 Disposal considerations

· Waste treatment methods

· Recommendation:

Smaller quantities can be disposed of with household waste.

Can be burned with household garbage after consulting with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations.

The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes.

- · Uncleaned packagings
- Recommendation: Disposal must be made according to official regulations.
- Recommended cleansing agent: Water, if necessary with cleansing agents.
